

TRANSBIO SUDOE

The Transnational Biocluster of the
European South-West area

INTERREG IVB SUDOE project 2012-2014

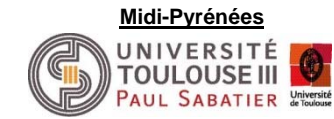

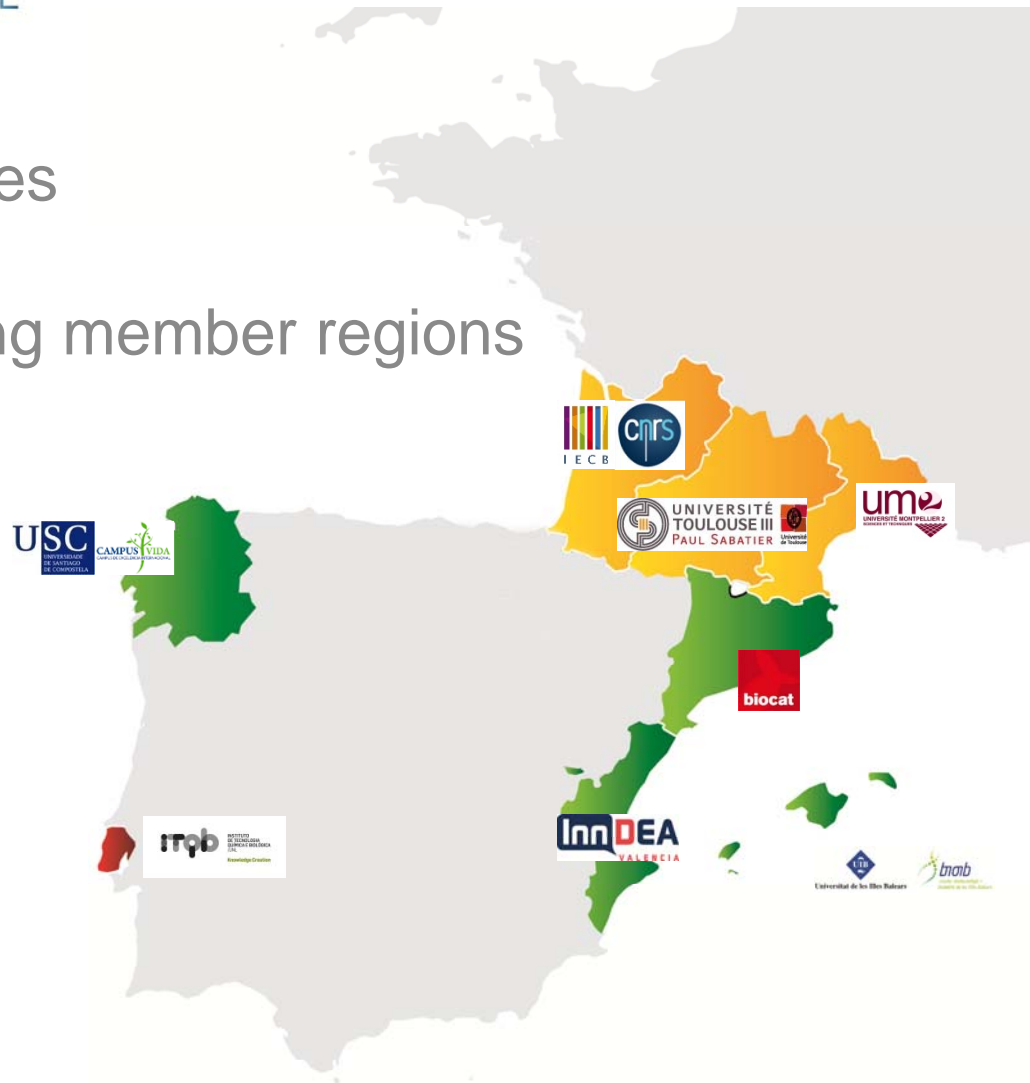

What's TRANSBIO?

■ 3 countries

■ 8 founding member regions

What's TRANSBIO?

■ With 29 associated members

Objectives

- **Promote** transnational interdisciplinary research, innovation and technological transfer in life sciences to build an innovative ecosystem in biotechnology and health
 - **Develop** a long lasting cooperative network by setting up thematic clusters of excellence, facilitating public-private partnerships and expanding the shared use of high level technology platforms
 - **Foster** the companies development and boost the launch of start-up and spin-off companies by providing the best environment in favor of their growth (creation of toc services, access to business incubators, ...)
-
- **Scheduled program** : training sessions, summer school, research mobility, field studies, workshop on rupture technologies, BtoB and RtoB meetings, cross fertilization and better access to technology platforms...

What's TRANSBIO?

■ A European transnational cooperation project

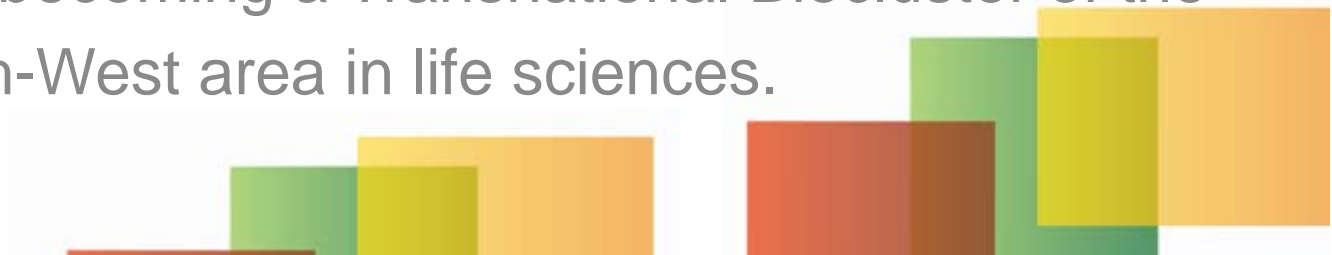

Co-financed by the INTERREG IV B SUDOE program (www.interreg-sudoe.eu) and dedicated to

"The promotion of innovation and the setting up of long lasting cooperative networks in the technology field" (SUDOE's priority 1).

■ 7 Work packages (WP):

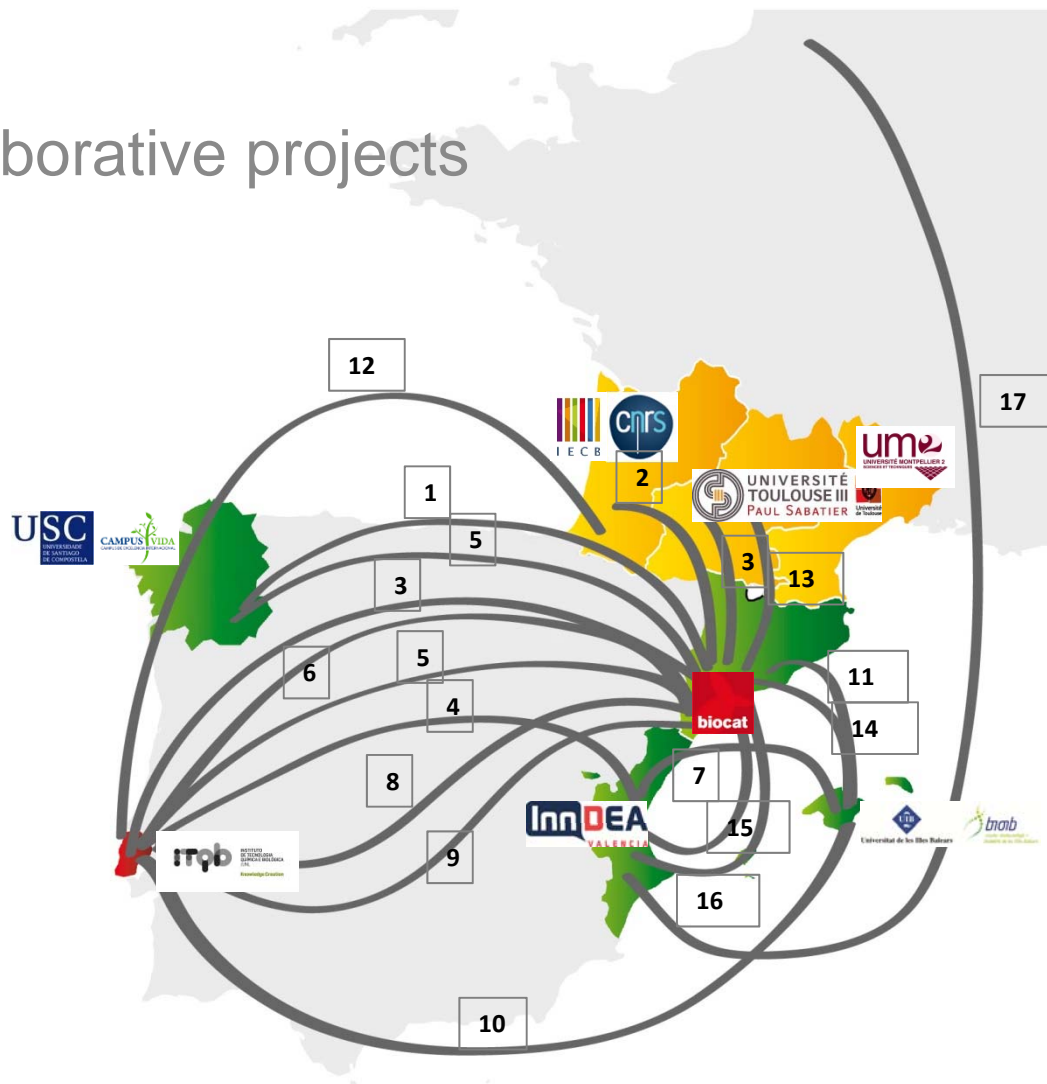

- WP1: Coordination and management
- WP2: Dedicated to set up transnational actions in Research and Training, innovation factors
- WP3: Dedicated to explore new tools for the Interdisciplinary Research to improve the innovative ecosystem in Biotech/Health
- WP4: Dedicated to make emerge transnational collaborative projects between public research and companies
- WP5: Dedicated to identify the best practices to contribute to the creation and development of companies
- WP6: Follow-up and Evaluation
- WP7: Promotion and Communication

■ With the aim of becoming a Transnational Biocluster of the European South-West area in life sciences.

Activities carried out

■ 17 collaborative projects

Activities carried out

16 interregional networking events

- 2 Emergence Forums on Human Healthcare & Agrofood Innovation

- 3 Workshops on Rupture technologies

- 1 Training sessions

- 2 Summer school on Medicines

- 1 Exhibition @ BIOSPAIN

- 1 Young Scientist Symposium

- 5 Field studies & 4 Thematic workshops

- 1 Closing meeting

- 2 Erasmus+ projects submitted:
 - FH+ and T-BET

- Establishment of a network of TTOs managers

- Contact with the Council of European Bioregions

- 3 visits of European Bioclusters / Exchanging and sharing of experience:

- MediWales – Cardiff, Wales  MediWales
- bioPmed – Piemonte, Italy  bioPmed
PIEMONTE INNOVATION CLUSTER
- Biocant – Coimbra, Portugal  biocant
